Volume 199 (1988)

Research Papers

| | |
|---|-----|
| Vector-mediated DNA double-strand break repair analysis in normal, and radiation-sensitive, Chinese hamster V79 cells (MTR 04555) | 1 |
| P.G. Debenham, N.J. Jones and M.B.T. Webb (Great Britain) | |
| Clastogenic effect of the plant alkaloid ellipticine on bone marrow cells of Wistar rats and on human peripheral blood lymphocytes (MTR 04556) | 11 |
| E.T. Sakamoto-Hojo, C.S. Takahashi, I. Ferrari and M. Motidome (Brasil) | |
| Induction of specific-locus and dominant-lethal mutations by cyclophosphamide and combined cyclophosphamide-radiation treatment in male mice (MTR 04557) | 21 |
| U.H. Ehling and A. Neuhäuser-Klaus (Federal Republic of Germany) | |
| Micronuclei in X-irradiated human lymphocytes (MTR 04558) | 31 |
| C. Kormos and G.J. Köteles (Hungary) | |
| Radiation induction of micronuclei in human lymphocytes (MTR 04559) | 37 |
| J.S. Prosser, J.E. Moquet, D.C. Lloyd and A.A. Edwards (Great Britain) | |
| The nature of <i>N</i> -ethyl- <i>N</i> -nitrosourea-induced mutations at the <i>white</i> locus of <i>Drosophila melanogaster</i> (MTR 04561) | 47 |
| A. Pastink, C. Vreeken and E.W. Vogel (The Netherlands) | |
| Inhibiting effects of nicotinamide on urethane-induced malformations and tumors in mice (MTR 04564) | 55 |
| H. Gotoh, T. Nomura, H. Nakajima, C. Hasegawa and Y. Sakamoto (Japan) | |
| Analysis of mutagenesis and sister-chromatid exchanges induced by 5-bromo-2'-deoxyuridine in somatic hybrids derived from Syrian hamster melanoma cells and Chinese hamster ovary cells (MTR 04569) | 65 |
| E.R. Kaufman (U.S.A.) | |
| Effects of cell fusion and deoxynucleosides on sister-chromatid exchanges in B-lymphoblastoid cell lines from 5 Bloom syndrome patients (MTR 04574) | 75 |
| Y. Shiraishi (Japan) | |
| Modifying role of dietary factors on the mutagenicity of aflatoxin B ₁ : In vitro effect of trace elements (MTR 04576) | 85 |
| A.R. Francis, T.K. Shetty and R.K. Bhattacharya (India) | |
| CASE, the computer-automated structure evaluation method, correctly predicts the low mutagenicity for <i>Salmonella</i> of nitrated cyclopenta-fused polycyclic aromatic hydrocarbons (MTR 04577) | 95 |
| H.S. Rosenkranz and G. Klopman (U.S.A.) | |
| Diagrammatic representation for chromosomal mutagenesis studies IV. Radiation-induced rearrangements in <i>Ateles</i> sp. (Primate, Platyrrhini) (MTR 04581) | 103 |
| F. Hoffschir, M. Prieur and B. Dutrillaux (France) | |
| Chromosome aberrations associated with CAD gene amplification in Chinese hamster cultured cells (MTR 04583) | 111 |
| L. Ottaggio, C. Agnese, S. Bonatti, P. Cavolina, A. De Ambrosis, P. Degan, A. Di Leonardo, M. Miele, R. Randazzo and A. Abbondandolo (Italy) | |
| Evidence for a specific regulation of <i>recA</i> gene transcription in <i>Escherichia coli</i> (MTR 04585) | 123 |
| A. Villaverde, I. Gibert and J. Barbé (Spain) | |
| The <i>aprt</i> heterozygote/hemizygote system for screening mutagenic agents allows detection of large deletions (MTR 04588) | 131 |
| W.E.C. Bradley, A. Belouchi and K. Messing (Canada) | |
| Studies on chromosome aberrations induced by incorporated tritium: effect of post-treatment with hydroxyurea and caffeine in G ₂ (MTR 04589) | 139 |
| F. Pelliccia, G. Belloni, A. Bosi, A. Micheli and G. Olivieri (Italy) | |
| Examination of vectors with two dominant, selectable genes for DNA repair and mutation studies in mammalian cells (MTR 04590) | 145 |
| P.G. Debenham, M.B.T. Webb, A. Stretch and J. Thacker (Great Britain) | |

| | |
|--|-----|
| Fanconi's anemia lymphocytes: effect of caffeine, adenosine and niacinamide during G ₂ prophase (MTR 04591) | 159 |
| J. Pincheira, M. Bravo and J.F. López-Sáez (Chile, Spain) | |
| An <i>uvsB</i> mutant of <i>Aspergillus nidulans</i> with high variable spontaneous mutation and intergenic mitotic recombination frequencies (MTR 04592) | |
| N. Babudri and G. Morpurgo (Italy) | 167 |
| Mutagen-induced fetal anomalies and death following treatment of females within hours after mating (MTR 04594) | |
| W.M. Generoso, J.C. Rutledge, K.T. Cain, L.A. Hughes and D.J. Downing (U.S.A.) | 175 |
| Direct selection of mutations in the human mitochondrial tRNA ^{Thr} gene: reversion of an 'uncloneable' phenotype (MTR 04595) | |
| S. Mita, R.J. Monnat Jr. and L.A. Loeb (U.S.A.) | 183 |
| Induction of specific-locus and dominant-lethal mutations in male mice by diethyl sulfate (DES) (MTR 04596) | |
| U.H. Ehling and A. Neuhäuser-Klaus (F.R.G.) | 191 |
| Effects of pingyanycin on chromosomes: A possible structural basis for chromosome aberration (MTR 04597) | |
| H.Q. Heng, W.Y. Chen and Y.C. Wang (P.R. China) | 199 |
| The chemical and enzymatic interaction of glutathione with the fungal metabolite, fusarin C (MTR 04598) | |
| W.C.A. Gelderblom, P.G. Thiel and K.J. Van der Merwe (South Africa) | 207 |
| The non-random occurrence of exchanges involving chromosomes 7 and 14 in human lymphocytes: A prospective study of control individuals (MTR 04599) | |
| E.J. Tawn (Great Britain) | 215 |
| Effect of adenosine 3',5' monophosphate on the mutation frequency induced by N-methyl-N'-nitro-N-nitrosoguanidine (MTR 04601) | |
| A. Hepburn and J.E. Dumont (Belgium) | 221 |
| An investigation using inhibition of G ₂ repair of the molecular basis of lesions which result in chromosomal aberrations (MTR 04603) | |
| R.C. Moore, C. Randell and M.A. Bender (Australia, U.S.A.) | 229 |
| Effect of the homokaryotic state of the <i>uvs-2</i> allele in <i>Neurospora crassa</i> on formaldehyde-induced killing and <i>ad-3</i> mutation (MTR 04604) | |
| F.J. de Serres, H.E. Brockman and C.Y. Hung (U.S.A.) | 235 |
| Differential efficiency of mutagenesis at three genetic loci in CHO cells by a benzo[a]pyrene diol epoxide (MTR 04605) | |
| M.C. MacLeod, G. Adair and R.M. Humphrey (U.S.A.) | 243 |
| Spectra of molecular changes induced in DNA of <i>Drosophila</i> spermatozoa by 1-ethyl-1-nitrosourea and X-rays (MTR 04606) | |
| M.A. Batzer, B. Tedeschi, N.G. Fossett, A. Tucker, G. Kilroy, P. Arbour and W.R. Lee (U.S.A.) | 255 |
| <i>Announcement</i> | 269 |
| <i>Foreword</i> (MTR 02000) | |
| by J.J. McCormick and V.M. Maher (U.S.A.) | 271 |
| <i>Research Papers</i> | |
| Towards an understanding of the malignant transformation of diploid human fibroblasts (MTR 02001) | |
| J.J. McCormick and V.M. Maher (U.S.A.) | 273 |
| Oncogenic potential in fibroblasts from individuals genetically predisposed to cancer (MTR 02002) | |
| M.H. Antecol (U.S.A.) | 293 |
| Human fibroblasts from cancer patients: lifespan and transformed phenotype in vitro and role of mesenchyme in vivo (MTR 02003) | |
| B. Azzarone, C. Chaponnier, P. Krief, M. Mareel, H. Suarez and A. Macieira-Coelho (France, Belgium, Switzerland) | 313 |
| Transformation studies on human fibroblasts from familial polyposis coli patients and normal donors (MTR 02004) | |
| J.D.A. Delhanty and S.H. Rider (U.K.) | 327 |
| Transformation of diploid human fibroblasts by transfection with the <i>v-sis</i> , <i>PDGF2/c-sis</i> , or T24 <i>H-ras</i> genes (MTR 02005) | |
| D.G. Fry, P.J. Hurlin, V.M. Maher and J.J. McCormick (U.S.A.) | 341 |
| The study of multi-stage carcinogenesis in retinoblastoma and familial polyposis coli patient-derived skin fibroblast cell culture systems (MTR 02006) | |
| A.R. Kinsella (U.K.) | 353 |
| The transformed (initiated) human cell phenotype: study of cultured skin fibroblasts from individuals predisposed to cancer (MTR 02007) | |
| L. Kopelovich (U.S.A.) | 369 |

| | |
|---|-----|
| Comparison of features of carcinogen-transformed human cells in vitro with sarcoma-derived cells (MTR 02009) | |
| G.E. Milo, B. Casto and S. Ferrone (U.S.A.) | 387 |
| Chemical and viral transformation of cultured skin fibroblasts from patients with familial polyposis coli (MTR 02010) | |
| M. Miyaki, N. Akamatsu, C. Sato and J. Utsunomiya (Japan) | 399 |
| Multi-step neoplastic transformation of normal human fibroblasts by Co-60 gamma rays and Ha-ras oncogenes (MTR 02011) | |
| M. Namba, K. Nishitani, F. Fukushima, T. Kimoto and Y. Yuasa (Japan) | 415 |
| Human cell transformation in the study of sunlight-induced cancers in the skin of man (MTR 02012) | |
| B.M. Sutherland, A.G. Freeman and P.V. Bennett (U.S.A.) | 425 |
| Macromolecular changes accompanying immortalization and tumorigenic conversion in a human fibroblast model system (MTR 02008) | |
| M. Varma and J. Leavitt (U.S.A.) | 437 |
| A comparison of markers of human fibroblast transformation induced by chemical carcinogen treatment or by transfection of an origin-defective SV40-containing plasmid (MTR 02013) | |
| R.J. Zimmerman and P.A. Cerutti (U.S.A., Switzerland) | 449 |
| <i>Contents, Vol. 199 (1988)</i> | 461 |
